

ESWACI

Decking, Sunshades, Profiles and Modules
both for Flooring, Wall Covering and Ceilings.

Lamiwood Introduces Eswaci

The new modular system, indoor & outdoor, dedicated to decoration of walls and ceilings. Eswaci is composed of a robust core enveloped by a protective shield that gives the wall covering unbeatable colours and textures, alongside an exceptionally high level of resistance to staining and sunlight. Eswaci can be used in both internal and external settings, and it can be installed either horizontally or vertically.

The modularity is engineered to give any surface a perfect symmetry, as well as a unique charme. Thanks to its flute-gap structure, it helps to reduce the reverberation, this way improving the acoustic performances of the settings where it is installed. Due to its technical and aesthetic features, Eswaci is a unique and unmatched decorating system of its kind.

The Lamiwood collection welcomes Eswaci, the new Extreme Shield for Walls and Ceiling System for indoor and outdoor covering module. Eswaci is composed of a robust core enveloped by a protective shield that gives the wall covering unbeatable colours and textures, alongside an exceptionally high level of resistance to staining and sunlight. Eswaci can be used in outdoor and indoor settings, and can be installed either horizontally or vertically.

Eswaci is a capped co-extruded composite, which means it has an advanced premium shield encasing all four sides around its inner core. The shield and core are extruded together under a very high temperature mold simultaneously, so there are no adhesives or chemicals that are harmful to the environment. The core is made from carefully selected recycled material and highly dense recycled hardwood fibres that allow for greater strength and durability. The shield uses an advanced engineering polymer to create a formulation which gives the boards Ultra protection against

Stains :

any external residue can be easily eliminated from the surface as the shield prevents absorption.

Mould, decomposition, cracks and splits: the shield is a 100% waterproof layer that prevents the formation of any mould or cracks.

Fading :

the shield's formula guarantees unrivalled chromatic stability over the years; no changes are visible to the human eye.

Aesthetic deterioration: the unique multi chromatic tones of Ultra shield are an integral part of the shield, which won't need painting, sanding or varnishing once over the years.

Outdoor

Stability, resistance and design. Eswaci has turned these drivers into its structural values to design high quality Wall & Ceiling Panels. Extremely durable and resistant, which do not fear any weather conditions nor decay and with no need for maintenance, allow you to bring outside all the class and warmth of the indoor ambience.

Eswaci Wall & Ceiling Panels

The brand new modular profile of the Eswaci family is conceived and developed to give a new perspective to the design of walls and ceilings, nurturing the continuity between indoor and outdoor spaces, which is a growing need of contemporary living.

ESWACI

Eswaci is Unique Innovative Technologic System

Eswaci is a capped co-extruded composite, encased in a technologically advanced shield that covers the central core. The shield and the core are coextruded in order to avoid the use of glues or chemical substances that could damage the environment. Equally, the co-extrusion process ensures extremely high standards of performance.

Shield Total Protection

100% polymeric external shield, which encapsulates the board in a protective waterproof film that is highly resistant to scratches, stains and fading over time.

Eco Sustainable Material

Ultra Shield is an eco-sustainable product. It is 95% composed of recycled materials, including recycled hardwood fibres that have no impact on deforestation.

Charm Realism Simplicity

Ultra Shield is the result of an ambitious but ultimately successful project in order to create an extremely realistic and appealing composite wooden board, more reliable and resistant than ever before.

Suitable For Indoor & Outdoor

Designed to easily and naturally blend into any outdoor context enhancing it with a distinctive breeze of exclusivity.

Full Application Range

Decking, sunshades, profiles and modules both for flooring, wall covering and ceilings. Lamiwood offers a wide family of products suitable for any designer requirement.

Think Green

Eswaci is an eco-sustainable product, in keeping with the Déco corporate philosophy. It is 95% composed of recycled materials, including recycled hardwood fibres that have no impact on deforestation, clear plastic bottles and high-density polyethylene (HDPE), an entirely biodegradable PVC substitute. Annual audits ensure that Eswaci complies with current environmental, health and safety regulations.

Elegant Everywhere

Eswaci combines the advantages of composite wood with all the warmth and simple beauty of natural wood. Designed to easily and naturally blend into any outdoor context enhancing it with a distinctive breeze of exclusivity.
